Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 8-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/21/05.

Claims 1 and 20 are generic to the species in Group I.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by USPAP 2003/0040771 A1 (Hyodoh et al.).

Hyodoh discloses different types of woven stents that can be formed from a variety of bio-absorbable materials, such as polylactic acid (see paragraphs 31 and 32). The stents can have a closure means in the form of a drawstring. Hyodoh explains in paragraph 338 that a monofilament (or drawstring) is threaded through small loops at one end of the stent (see Figure 12). Pulling on the drawstring closes that end of the stent.

The language "*when implanted in a vein*" in line 4 of claims 1 and 20 is directed toward intended use and is not given patentable weight.

Art Unit: 3731

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,035,706 to Gianturco et al. discloses a stent with a drawstring closure at one end (see Fig. 7A&B). USPAP 2002/-143387 A1 (Soetikno et al.) discloses a stent with a drawstring closure at one end (entire disclosure).
